

Claims

- [c1] What is claimed is:
- [c2] 1. A metallic cabinet door organizer for the inner panel of a cabinet door, said metallic cabinet door organizer comprising: a flat metal plate; an optional adhesive agent layer for adhering said flat metal plate to the inner panel of a cabinet door; an optional color and/or other coating/sealant applied to the said metal plate; and optional anchoring hardware for anchoring said metal plate to the inside of the inner panel of a cabinet door.
- [c3] 2. The metallic cabinet door organizer according to claim 1, wherein said flat metal plate is non-corrosive.
- [c4] 3. The metallic cabinet door organizer according to claim 1, wherein said flat metal plate is covered with a color agent layer.
- [c5] 4. The metallic cabinet door organizer according to claim 1, wherein said flat metal plate is covered with a protective agent layer.
- [c6] 5. The metallic cabinet door organizer according to claim 3, wherein said color agent layer is covered with a pro-

tective agent layer.

- [c7] 6. A metallic cabinet door organizer for the inner panel of a cabinet door, said metallic cabinet door organizer comprising: a flat metal plate; an optional adhesive agent layer for adhering said flat metal plate to the inner panel of a cabinet door; a color and sealant applied to the said metal plate; and anchoring hardware for anchoring said metal plate to the cabinet door.
- [c8] 7. The metallic cabinet door organizer according to claim 6, wherein said flat metal plate is non-corrosive.
- [c9] 8. The metallic cabinet door organizer according to claim 6, wherein said flat metal plate is covered with a color agent layer.
- [c10] 9. The metallic cabinet door organizer according to claim 6, wherein said flat metal plate is covered with a protective agent layer.
- [c11] 10. The metallic cabinet door organizer according to claim 8, wherein said color agent layer is covered with an optional protective agent layer.
- [c12] 11. The metallic cabinet door organizer according to claim 1, wherein said metal plate is secured to the cabinet door within the inner rabbet of the cabinet door's

outer frame.
